4' Bale Length	39 bales	78 bales	130 bales
5' Bale Diameter	30 bales	60 bales	100 bales
6' Bale Length	24 bales	48 bales	80 bales

Selection Notes & Check List

The recommended tarp sizes are based on TRUE bale size. Actual stack measurements are suggested.

Choose your bale diameter and corresponding stack configuration to locate tarp size.

Stack configurations detailed above are recommendations only.

Tarp dimensions are always listed by stack width x stack length.

To calculate the suggested length of your tarp, measure the stack and add 2' to allow the tarp to fold over the stack ends.

Custom size tarps can be made for larger stack configurations— just ask!
