## **INLAND TARP & LINER ANNOUNCES NEW GENERAL MANAGER**

*Matthew Purcell Promoted to General Manager of Inland Tarp & Liner*

**Moses Lake, Washington**—After eleven years with Inland Tarp & Liner, most recently serving as the Sales & Procurement Manager, Matthew Purcell has been promoted to General Manager.

Since joining Inland Tarp & Liner in May 2013, Matthew Purcell has played a pivotal role in the growth of key departments, including human resources, sales, and procurement. Known across the geosynthetic, lining, and covering industries as a consummate professional, Matthew has been instrumental in bringing customer-centric innovations to the marketplace. Notable among these innovations are the ITL Reinforced Concrete Roll®, a versatile lining solution, and the patent-pending Mound Defender, a game-changer in athletic field covering.

With a degree in finance and extensive experience in the geosynthetics industry, Matthew brings a wealth of expertise to our team, partners, and customers. He consistently demonstrates exceptional leadership, dedication to industry progress, and a strong commitment to the company's values and objectives.

As General Manager, Matthew will oversee daily operations and be responsible for developing and implementing a comprehensive growth strategy for ITL.

Established 40 years ago, Inland Tarp & Liner has evolved from manufacturing and selling agriculture covers to becoming a leader in geosynthetic solutions. In 2005, ITL expanded into the oil and gas industries, gaining recognition for its expertise in geomembrane fabrication and anti-slip geotextiles. With locations across the United States and a global reach, Inland Tarp & Liner serves diverse business interests.
